Scenario Modelling for a Low Carbon Wales

Regional scale modelling on the potential for CO₂ emission and cost savings
by low carbon measures in the Welsh domestic sector

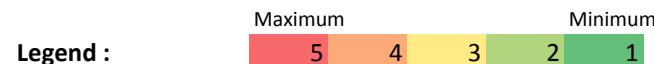

Annex

| | Glazing - single to new | Glazing - old double to new | Glazing (to Best Practice) | Loft insulation 0 - 270mm | Loft insulation 25 - 270mm | Loft insulation 50 - 270mm | Loft insulation 75 - 270mm | Loft insulation 100 - 270mm | Paper type solid wall insulation | Pre'76 cavity wall insulation | 76-'83 cavity wall insulation | Post '83 cavity wall insulation | Solid wall insulation | DIY floor insulation | Improve airtightness | Insulate primary pipework | Uninsulated cylinder to high performance | Modest cylinder insulation to high performance | Room thermostat to control heating | Total |

Table A.4 :

Contribution of each measure to the savings total for each local authority. Percentages based on absolute values.

High fuel cost scenario, EMR grid decarbonisation profile, 7% interest rate, taxation included.

Legend :

Five colour scale from maximum (red) to minimum (green) values

Colour coding per row i.e. which measure offers the greatest reduction in absolute terms per local authority.

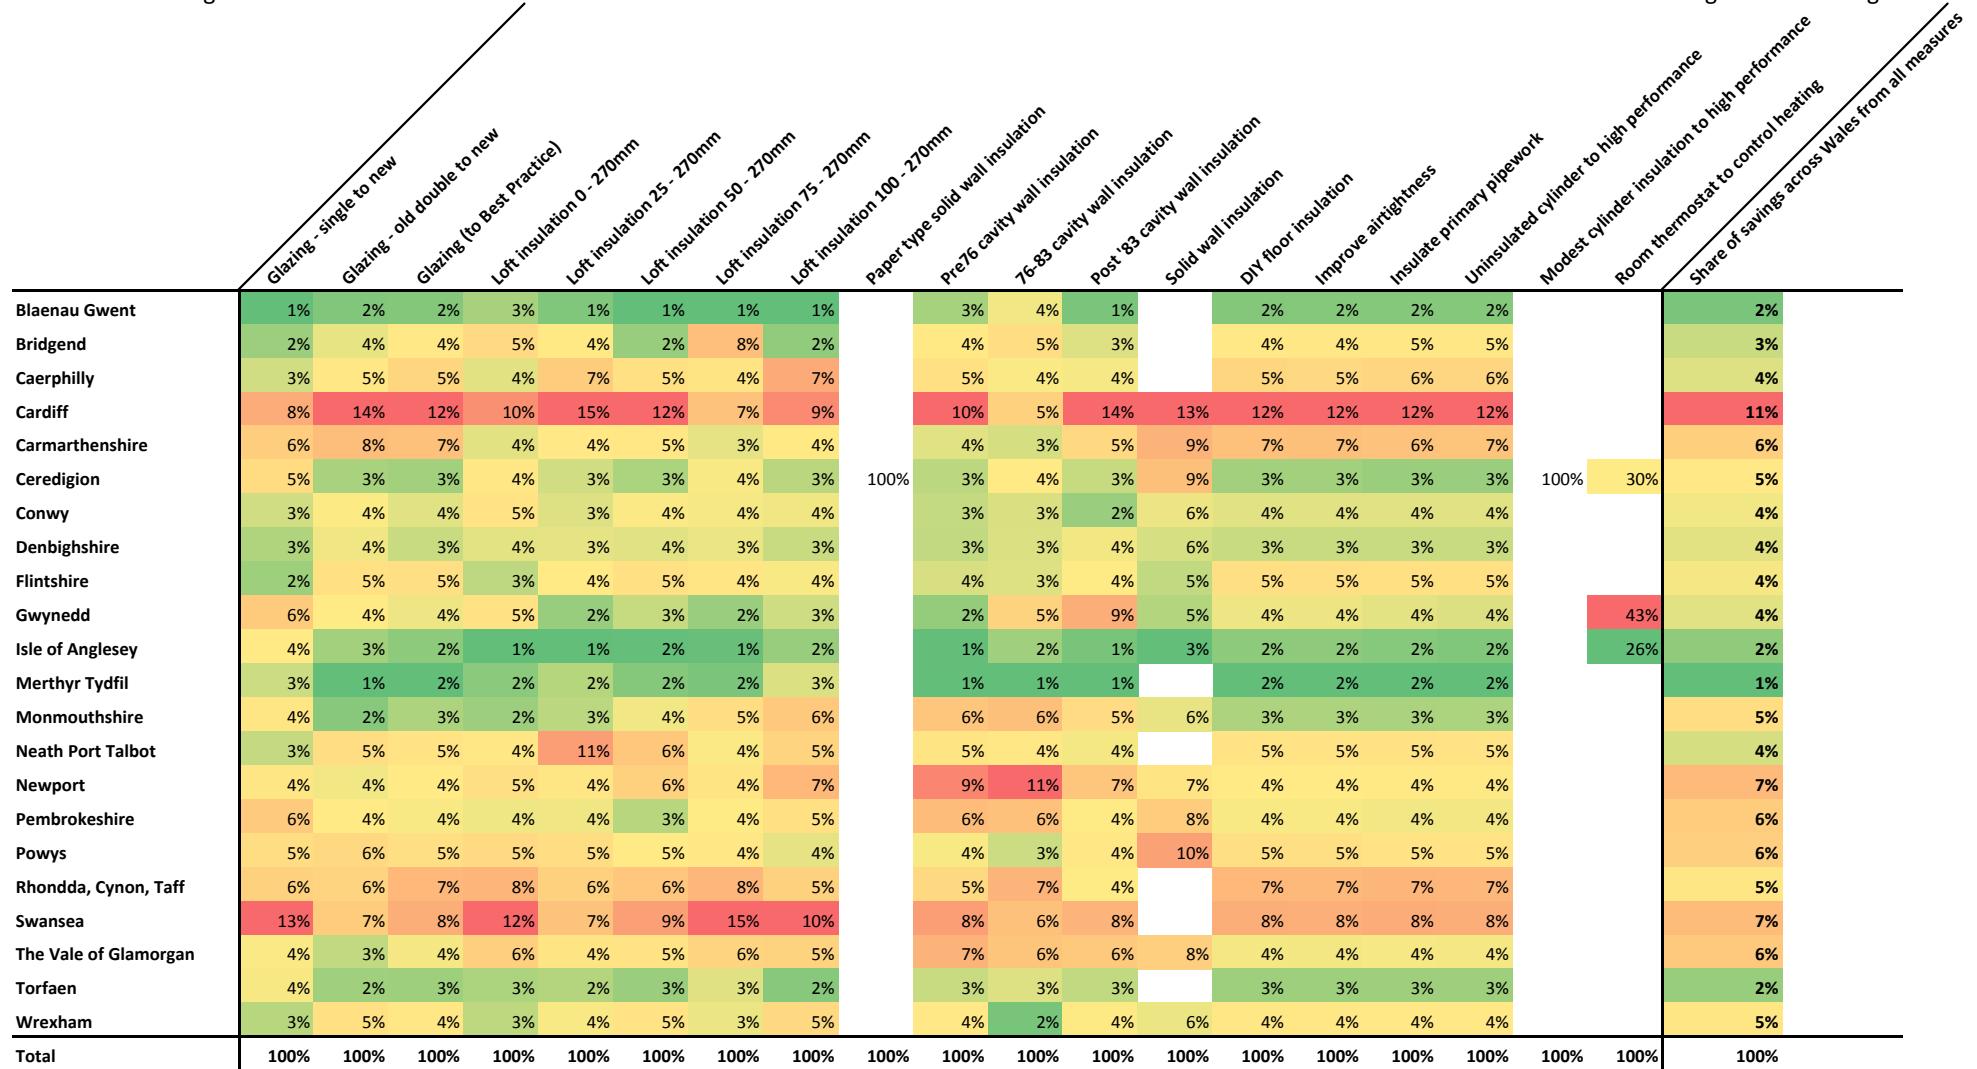

Table A.5 : Share of the potential for savings per measure located in each local authority. Percentages based on absolute values.
High fuel cost scenario, EMR grid decarbonisation profile, 7% interest rate, taxation included.

Five colour scale from maximum (red) to minimum (green) values

Colour coded per column i.e. which local authority has the greatest reduction potential in absolute terms per measure.

Table A.7 :

Share of the stock that is cost-effective to retrofit per measure. Each home may receive multiple measures.

High fuel cost scenario, EMR grid decarbonisation profile, 7% interest rate, taxation included.

Legend :

| Maximum | Minimum |
|---------|---------|
| 5 | 1 |

Five colour scale from maximum (red) to minimum (green) values

Colour coded per row i.e. which measure has the greater potential in the stock per local authority.

Table A.9 : Normalised figures of the investment needed per household in each local authority.

High fuel cost scenario, EMR grid decarbonisation profile, 7% interest rate, taxation included.

Legend :

Five colour scale from maximum (red) to minimum (green) values

Colour coded per column i.e. which local authority has the greatest need for investment per household.

Table A.10 : Cost effectiveness of each measure assuming lifetime cost and CO₂ savings as calculated at 2012, 2017 and 2022. High fuel cost scenario, EMR grid decarbonisation profile, 7% interest rate, taxation included.

Legend :

A horizontal color bar consisting of five colored segments: red, orange, yellow, green, and blue. The red segment is labeled '5' and the blue segment is labeled '1'. The orange and yellow segments are unlabeled. The word 'Maximum' is positioned above the red segment, and the word 'Minimum' is positioned above the blue segment.

Five colour scale from maximum (red) to minimum (green) values
Colour coded per row i.e. most cost effective measure per local authority.

Scenario Modelling for a Low Carbon Wales

Table A.11 : Cost effectiveness of each measure assuming lifetime cost and CO₂ savings as calculated at 2012, 2017 and 2022. High fuel cost scenario, EMR grid decarbonisation profile, 7% interest rate, taxation included.

High fuel cost scenario, EMR grid decarbonisation profile, 7% interest rate, taxation included.

Legend :

Five colour scale from maximum (red) to minimum (green) values

Colour coded per column i.e. local authority where the measure is most cost effective.
